## > **KM-901MAH50**

daily ice production capacity of up to 400kg

> **KM-901MAH50**  
(With Hoshizaki Storage Bin - **B-900**)

Crescent-shaped ice moves around freely yet packs together tightly in its bin, maximising storage capacity. Individual crescents do not stick together as there are no air pockets so that each piece of ice comes across distinctive in a cup of drink. This unit meets the need for large amounts of ice daily.
