Aside for drinks, ice is important for preservation purposes. Hoshizaki's FM ice machines produce flakes consisting of 70% ice and 30% water, used primarily for cooling purposes and has no 'freeze-burn' effect when displaying fresh produce. It is also used in large facilities such as healthcare, catering, supermarket chains or even cocktail bars.

FEATURES

- > carbon auger bearings enhances product life expectancy, reduces maintenance cost
- > hydrocarbon refrigerants lowers energy consumption
- > 100% hfc free co2 foam insulation maintains consistent temperature
- > smart computer board technology
- > stainless steel exterior
- > led error indicator for easy diagnosis
- > self-contained unit
