

A high output compact soft serve series

## Specification

Cylinder	1.5L
Hopper	6.5L
Machine Dimension(mm)	385*689*692
Packing Dimension(mm)	415*719*792
Refrigeration system	3200BTU/hr, R404A
Pre-cooling system	210BTU/hr,R134a
Output	1.5kw
Beater motor	0.55kw×2
Power specification	220V,50/60Hz
Capacity	20-25L/hr
N.W.	100kg
G.W.	120kg

### Spring back handle

Automatic reset position

### Built in Agitator

Agitator in hopper gives consistent chill throughout the product

### High Over Run

New Hopper Inlet valve to increase air overrun within product

### Standby function

Standby function for both hopper and cylinder

### Mix low alarm function

Mix low alarm function for both hopper and cylinder

### LCD Panel

Easy LCD panel operation

### Temperature adjust

One touch temperature adjustment

### Direct Drive Motor

Motor fitted direct to gearbox for even beater bar operation

### Parts

Constructed with European parts

### Quick Refresh Function

When not used for long period – refresh the product to give a consistent first serving
